Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner agrees that the applicant's proposal to change the term "network addresses" to the more specific "World Wide Names" would overcome the previous rejection of record. The examiner suggests that the applicant may also avoid the prior art of record by distinguishing the functionality of the monitoring/data collecting features of the present invention. For example, the applicant may consider further defining the executable modules to show that they create a common interface which allows monitoring in a resource-independent manner, etc. Amendments of this type may also overcome the previous rejection of record.
